Certificate of Completion

Zachary Lorenzo Fabian Sulit

In recognition of **Zachary Lorenzo Sulit** for successfully completing 200 hours of specialized work on the SteelSnap Structural Detection Engine project, demonstrating exceptional proficiency in:

- Annotation engineering and structured ground-truth data preparation from architectural and structural PDF drawings
- Advanced detection error analysis and behavioral evaluation across diverse PDF drawing conditions and conventions
- Benchmark and evaluation workflow management using Python-based testing frameworks
- Applied computer vision and machine learning pipeline assessment using industry-standard libraries and object detection models
- Technical collaboration through code review, model performance interpretation, and findings communication

This certificate acknowledges the technical rigor, analytical depth, and professional contribution brought to the development and validation of structural element detection systems.

Awarded on: June 10, 2026

Authorized By:

A handwritten signature in black ink, appearing to read 'Ardi'.
