PROFESSIONAL SUMMARY

- Combines rigorous data science training with a professional multimedia background to deliver compelling, visual data narratives.
- Transforms complex, unstructured datasets into actionable insights using predictive modeling, Power BI, and Tableau.
- Overcomes real-world data limitations by engineering automated web-scraping pipelines and efficient data workflows.
- Consistently translates rigorous technical findings into clear, strategic outcomes for diverse stakeholders

WORK EXPERIENCE

Multimedia Editor, Vhub Solutions | Remote

Quezon City, National Capital Region, Philippines

2021 – 2023 | Part-Time

- Edited and assembled multimedia content to ensure consistent quality and enhance audience engagement across digital platforms.
- Optimized video and audio files for multiple formats, increasing accessibility and compatibility across diverse viewing environments.
- Curated and integrated diverse multimedia assets to streamline content delivery, significantly improving user retention and platform responsiveness.

Front Office Assistant, Apao Law Office | On-site

Oroquieta, Northern Mindanao, Philippines

Apr 2018 – Jun 2018 | Part-Time

- Compiled and organized comprehensive client record booklets to maintain accurate and easily accessible documentation.
- Managed the systematic filing and arrangement of sensitive legal documents, ensuring efficient retrieval and confidentiality.
- Prepared and staged critical paperwork and materials to facilitate seamless official signing and processing workflows.

SKILLS

Technical Skills

- **Programming & Query Languages:** Python, R, SQL, C++, Go, JavaScript
- **Libraries & Frameworks:** TensorFlow, PyTorch, Keras, Scikit-Learn, NumPy, Pandas, fastf1, NestJS, Prisma.
- **Databases & Infrastructure:** PostgreSQL, SQLite, Snowflake.
- **Data Visualization & Tools:** Power BI, Tableau, Microsoft Excel, Jupyter.

Soft Skills

- Data Storytelling, Cross-Functional Collaboration, Technical Communication, Adaptive Problem Solving

PROJECTS

F1 Pit Stop Strategy Solver: Dynamic Programming

Personal Project

- Engineered a data-driven strategy solver in Python to calculate optimal Formula 1 pit-stop windows using real race telemetry.
- Developed polynomial degradation models and applied fuel mass corrections to accurately simulate tire wear and race conditions.
- Implemented Dynamic Programming algorithms within Jupyter Notebooks to compute strategies that minimize overall race time.

F1 Pit Stop Optimization: Reinforcement Learning

Personal Project

- Trained a Q-Learning agent to optimize F1 pit stop timing and tire selection using real 2023 Monza telemetry data, modeled as a Gymnasium environment with tire degradation and race regulations.
- Implemented action masking to replace fragile reward-shaping penalties, achieving stable convergence and consistently beating a rival bot's fixed strategy.

DOST-PHIVOLCS Earthquake Epicenter Estimation System (Ongoing)

Data Science & ML Student Collaborator

- Analyzed historical and contemporary seismic datasets to establish the data foundation for future mathematical epicenter estimation models.
- Engineered synthetic data generation pipelines to augment sparse historical earthquake records, ensuring sufficient volume and variance for upcoming machine learning training phases.
- Developed automated web-scraping scripts to continuously extract and integrate the latest real-time earthquake data into the central repository.
- Maintained and optimized the backend infrastructure by troubleshooting and resolving architectural issues within the NestJS and Prisma environment.

CERTIFICATES

Data Analytics Essentials

Cisco

- Data Analysis, Data Cleaning

Career Boost With Power BI and AI

Exodus Experts

- Power BI, Artificial Intelligence, Data Analysis

Machine Learning Pipelines with Azure ML Studio

Coursera

- Machine Learning,

EDUCATION	Bachelor of Science in Data Science, Ateneo de Davao University	Davao City, Philippines
	<i>Jun 2023 – Present</i> • President's Lister (1st Year, 1st Semester) • Dean's Lister (1st Year, 2nd Semester) • President's Lister (2nd year, 2nd Semester) • President's Lister (3rd year, 1st Semester)	
	STEM, Ateneo de Davao Senior High School	Davao City, Philippines
	<i>2021– 2023</i> • Graduated with Honors	
ORGANIZATION	Ateneo de Davao Mathematics Society <i>2023 – 2026</i> • Creatives Committee	Davao City, Philippines
